

PERFORMANCE TESTS

Mack T-11

Status

As soon as the ASTM research report is published, the T-11 will be brought into the ACC Code of Practice and will be available for test registration against PC-10 requirements. In fact, the ACC has agreed to allow pre-registration of T-11 results back to February 17, 2004, which is the date the HDEOCP endorsed the test. The Mack T-11 test procedure has been issued as ASTM standard D7156.
