

Infineum's Commitment to Responsible Care®

As a member of the American Chemistry Council (ACC), Infineum is an active participant in the Responsible Care® initiative. With Responsible Care® in mind, Infineum and other ACC member companies are continuously looking for ways to improve the health, safety and environmental protection performance in our industry. To this end, we would like to request your feedback on how your company addresses the health, safety and environmental aspects of the products supplied to Infineum. In order to make it easy for you to provide us feedback, please complete the attached questionnaire and return it to the name and address below preferably by email.

For your reference, below are the guiding principles included in the Responsible Care® Management System that Infineum has adopted. Infineum welcomes the opportunity to assist your company in any initiative related to Responsible Care®.

Responsible Care® Guiding Principles

1. Seek and incorporate public input regarding products and operations.
2. Manage the manufacture, transportation, use and disposal of chemicals in a safe and secure manner.
3. Ensure that health, safety, security, the environment and resource conservation are considered for all new and existing products and processes.
4. Provide information on health, safety, security and environmental risks and pursue protective measures for employees, the public and other key stakeholders.
5. Work with customers, carriers, suppliers, distributors and contractors to foster the safe use, transport and disposal of its chemicals.
6. Operate facilities in a manner that protects the environment and the health and safety of employees and the public.
7. Support education and research on the potential health, safety and environmental effects of its products and processes.
8. Work with others to resolve problems associated with past handling and disposal practices.
9. Assist in the development of responsible laws, regulations and standards that safeguard the community, workplace and environment.
10. Encourage others to practice the principles of Responsible Care®.

On behalf of Infineum, we greatly appreciate your candid feedback to help us ensure that our customers, our community and our employees receive the proper information and support to handle your products in a safe and environmentally responsible manner.

Sincerely yours,
Mary Ann Pulsfort
